DETAILED ACTION

1. Claims 1,9-14,23-24,31-37,39-47 and 49-50 have been allowed in the previous action dated 02/11/2011. Claim 51 contained the allowable subject matter but it has been rejected under 112 second paragraph, while invoking 112 sixth paragraph.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 51 is rejected under 35 U.S.C. 112 second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim elements in claim 51, for example “means for encoding a local system data structure comprising at least one tag representing the local file system; a means for encoding a host system data structure comprising at least one tag representing the host file system” are means (or step) plus function limitations that invokes 35. U.S.C. 112, sixth paragraph. However, the written description fails to disclose any structure, material or acts for the corresponding elements. Applicant is required to:

(a) Amend the claim so that the claim limitation will no longer be a means (or step) plus function limitation under 35 U.S.C. 112, sixth paragraph; or

(b) Amend the written description of the specification such that it expressly recites what structure, material, or acts perform the claimed function without introducing any new matter (35 U.S.C. 132(a)).

If applicant is of the opinion that the written description of the specification already implicitly or inherently discloses the corresponding structure, material, or acts so that one ordinary skill in the art would recognize what structure, material or acts perform the claimed function, applicant is required to clarify the record by either:

(a) Amending the written description of the specification such that it expressly recites the corresponding structure, material, or acts for performing the claimed function and clearly links or associates the structure, material or acts to the claimed function, without introducing any new matter (35 U.S.C. 132(a)); or

(b) Stating on the record what the corresponding structure, material, or acts, which are implicitly or inherently set forth in the written description of the specification, perform the claimed function, for more information, see 37 CFR 1,75(d) and MPEP §§ 608.01(o) and 2181.
